

Name \_\_\_\_\_

# K-W-L Chart for

\_\_\_\_\_ *(your animal)*

Write about what you **know** about your African animal. Then write questions about what you **want** to know. Lastly, when you have finished the unit, write about what you've **learned**.

**What I Know:**

**What I Want to Know:**

**What I Learned:**

<b>Example</b> <i>A cheetah eats antelope.</i>	<b>Example</b> <i>How does a cheetah kill the antelope? Where do antelope live? How many antelope will a cheetah eat in one week? Do antelope ever escape from the cheetah?</i>	<b>Example</b> <i>Cheetahs can run up to 70 mph to catch an antelope. They find the antelope grazing on the African savannah. The cheetahs have to suffocate the antelope because they have small jaws and can't kill in one bite.</i>
