Intel Security today announced that leading research firm Gartner, Inc. has positioned the company in the leaders quadrant for its "Magic Quadrant for Security Information and Event Management" (SIEM) as published on July 20, 20151. According to the report, "Organizations are failing at early breach detection, with more than 92% of breaches undetected by the breached organization. The situation can be improved with stronger threat intelligence, the addition of behavior profiling and better analytics." Additionally, the report highlights that "during 2014, the SIEM market grew from $1.5 billion to approximately $1.69 billion, achieving a growth rate of about 14%. The primary drivers that were in place at the start of 2014 remain in effect. Threat management is the primary driver, and compliance remains a secondary driver." View a copy of the Gartner 2015 Magic Quadrant for SIEM report and learn more about McAfee SIEM solutions.
