Contact Intel PR

At Strata + Hadoop World in New York City today, Intel unveiled new details on pilot programs from Penn Medicine, Icahn School of Medicine at Mount Sinai, and Oregon Health & Science University which provide clinicians with greater insight to improve patient outcomes using its Trusted Analytics Platform (TAP). TAP is an open source project that simplifies big data analytics solutions in the cloud for developers and data scientists. In this blog post, Ron Kasabian, vice president and general manager of Big Data Solutions, sheds light on the universe of possibilities that TAP will enable; click for more information on TAP deployments.
