[Contact Intel PR](#)

At the [X Games Aspen](#) this week, Intel will embed the [Intel® Curie™](#) compute module onto snowboards during the Men's Snowboard Slopestyle and Men's Snowboard Big Air competitions. The technology will help provide a new perspective into amazing athletic feats accomplished by instantly sharing insights on how fast competitors move, their force on landing, and even how many degrees they rotate in the air. The data will be integrated into the broadcast to enhance the fan experience. Fans can [catch all the action on ESPN and ABC](#) and view more on the [press kit](#)
