Spent with Arizona-based organizations annually

\$8.6 billion

Annual economic impact, based on 2019 data

\$32 billion

In capital invested in Arizona since 1979

554,000+

Employee and retiree volunteer hours in Arizona schools and nonprofits since 2017

\$27 million

In charitable giving since 2017 to local schools and nonprofits

In October 1980, the first wafers came off the Intel production line at Fab 6 in Chandler - building the foundation for what is now one of Intel's largest manufacturing sites in the world, and home to nearly 12,000 of the brightest Arizonans helping to define the future of technology.

Intel's U.S. Manufacturing Powerhouse

In September 2021, we broke ground on two new factories, a \$20 billion multi-year investment. We expect to create 3,000 new Intel jobs, 3,000 construction jobs, and indirectly support 15,000 additional jobs in Arizona.

Intel in the Community

Our success depends on the health of our local community. Intel hires from local schools and universities, invests millions in research and development, and spends billions each year with Arizona-based businesses. We don't just work here – we live here too. We're raising our families here, volunteering in classrooms and at nonprofits, and serving in community leadership positions.

Inclusive Innovation

We believe current and future workforces need to reflect the makeup of this nation. Together with a broad range of stakeholders, we're working to make careers in technology fully inclusive and expand digital readiness for everyone.

Sustainable by Design

From investing in on-site alternative energy, green buildings, and water conservation, to implementing circular waste management practices and partnering with nonprofits on water restoration projects in the community, a focus on the environment is a focus on our future.

Impact Enabled by Our Employees

In close collaboration with our employee volunteers, the Intel Foundation, and community partners, we are working to expand access to opportunity and empower the next generation of innovators. Supporting education and other important community priorities is vital to making Arizona a vibrant community for everyone to live and work.
